Complete Weight Loss Surgical Services

Intra - Gastric Balloon

Laparoscopic Gastric Banding

Laparoscopic Sleeve Gastrectomy

Laparoscopic Gastric Bypass

The Surgeons at LAP Surgery Australia have over 12 Years experience in Keyhole Weight Loss Surgery and have treated over 2,500 patients.

Our clinic prides itself as a centre of excellence with a strong focus on supporting you through your weight loss journey and beyond.

The Intra- Gastric Balloon is indicated as a 6 month Weight Loss Therapy for people who need to lose 15 to 20 kilos. Approximately 70-80% of the weight loss achieved with the ORBERA® System occurs in the first 3 months of treatment. Our program helps you achieve long term weight loss.

The Adjustable Gastric Band is for people who are severely overweight and need to lose 20 to 50 kilos. The Gastric Band works by reducing the amount of food you can eat and giving you a feeling of satisfaction and reducing your hunger drive. It is very safe and effective.

The Laparoscopic Sleeve Gastrectomy and the Gastric Bypass are advanced surgical procedures for people who are not suitable for the Intra Gastric Balloon or the Adjustable Gastric Band or for people who have not been successful with Gastric Banding. These procedures may also be offered to those who have had Gastric Stapling in the past
